

TECHNICAL DATA SHEET

DataPUCK™

SITE LOGGER

Temperature | Humidity

DataPUCK's capture historical ambient temperature and humidity data for up to 2 years and seamlessly store conditions in CLIMIT's cloud database.

FEATURES

- Capture ambient temperature and humidity data at selected intervals
- Easily connects to the CLIMIT™ mobile app via Bluetooth
- Data is formatted into professional, intuitive reports
- Ideal for post installation monitoring and warranty protection
- Up to 2 year battery life

The CLIMIT™ DataPUCK™ is a long-term, ambient temperature and humidity, site logger featuring the latest Bluetooth® 5.0 technology and a NRF52832 memory chip. It captures and records temperature and relative humidity from the surrounding environment as historical data. The DataPUCK™ can store up to 16,384 measurements and has a battery life up to 2 years.

Any mobile phone with Bluetooth 5.0 or above, and the CLIMIT™ app, can seamlessly connect to the DataPUCK™ to upload and view recorded conditions. Your CLIMIT™ app securely stores data in the CLIMIT™ cloud database in your job file. Generate CLIMIT™ reports for professional communication with clients.

DEVICE CHARACTERISTICS

Climate Measurements

Temperature	Accuracy Tolerance	+/- 0.2° F (0.1° C)
	Resolution	0.2° F (0.1° C)
Humidity	Accuracy Tolerance	±1.5% RH (typ.)
	Resolution	0.1% RH

Operating Range -22°F to 140°F (-30°C to 60°C)

Measurement Interval Minimum 1 hour, adjustable

Storage Capacity 16,384 Readings

Power Sources

Battery Life	Up to 2 years (depending on frequency of usage)
	Replaceable CR2450 Coin Cell

Physical Characteristics

Weight	1 oz (30g)
Dimensions	Length: 2.4 in. (60mm)
	Width: 2.6 in. (67mm)
	Height: 0.6 in. (16mm)

Connectivity

Frequency	2.4 GHz
Protocol	Bluetooth, BLE 5
Typical Read Range	Up to 150 ft. or 46m

Indicator/Buttons

LED	1 LED Status
Button	Touch Sensitive

Certifications

IC	4100A-BM832
Regulatory (FCC)	FCC ID: X8WBM832

Jobsite Conditions Report

Feb 29 – Apr 12

Ambient Temperature

Ambient Humidity

QUICK START

Step 1. Place your DataPuck™ device in the desired location that you want to monitor temperature and relative humidity.

Powering On/Off

Operation	LED Sequence	Event Description
Press button for 2 seconds	Green LED on for 2 seconds	Device is starting up
Press button for 2 seconds	Red LED blinking twice for 1 second	Device is shutting down
	Green LED blinking every 10 seconds	Device is broadcasting

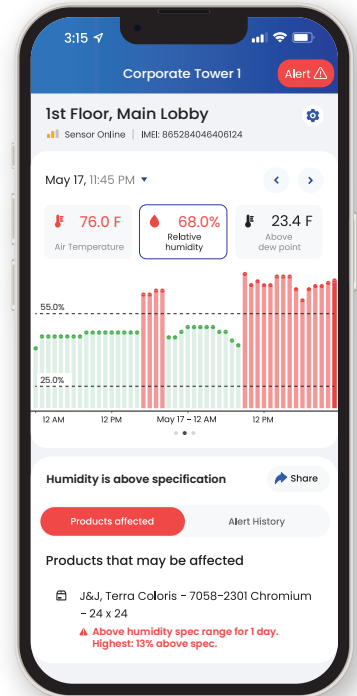

Step 2. Download the CLiMIT™ app from either the Apple App Store or the Google Play store.

Step 3. Open the app, give your DataPuck™ device its own unique name, adjust the default settings, and you are ready to begin monitoring temperature and RH at whatever frequency you desire. The DataPuck™ has a password feature. The password can be set from the "Device Settings" menu. Once a password has been set, the user will be prompted to enter the password every time they try to change the settings for that device.

Note: Users can still sync the DataPuck™ device and view the data without entering a password. For the DataPuck™, the password will have to be entered in order to sync and view the data.
