

CLIMIT™
Real-Time Site Monitoring

REMOTELY MONITOR & COMPARE SITE CONDITIONS TO PRODUCT SPECS

CONNECT

MONITOR

PROTECT

REMOTELY DETECT JOBSITE CONDITIONS with real-time alerts

CLiMIT™ sensors detect changes in jobsite conditions, adding a new level of visibility and quality control to your projects. Receive an alert on your mobile device, to ensure your products stay within manufacturers' specifications. Have adverse conditions developed while you're not at work? Proactively take corrective actions to help ensure successful project outcomes.

Steve Cloud,
Owner, Higgins Flooring

"CLIMIT helped us avoid what could have been a seven figure calamity by providing us real-time visibility to data!"

Jim Lockwood,
Quality & Productivity Manager
Consolidated Flooring

"This is going to change the industry. Every single contractor should be utilizing this software. It's simple to use and is exactly what our market needed."

Generate Reporting

The CLIMIT™ desktop application enables users to create customized and professional pdf reports within minutes, saving contractors hours of valuable time.

Reports include summary graphs of ambient and concrete conditions, or any content captured in the project's job file, like photos and notes.

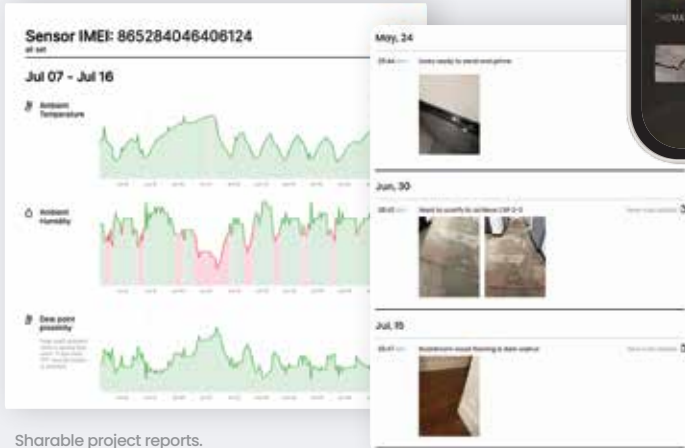

Photo Documentation

"Maintain thorough, contemporaneous records. Take numerous daily photos & save them by date."

Ron Ciotti

Partner,
Hinckley Allen & Snyder LLP

Contractor Benefits

Ultimate project visibility

Instantly view & record detailed jobsite conditions across all of your projects before, during, and after installation.

Organize & store information

Capture & store important jobsite information (photos, notes, batch codes) in your secure, CLIMIT™ jobfile for future use.

Retrieve Jobfile information

Investigate past climate conditions and locate important notes, and photos by selecting calendar dates or more specific filtering criteria.

Avoid expensive re-work

Receive real-time alerts based on actual project data detected by sensors when compared to product manufacturers' specifications.

Keep everyone informed

Easily share content, and maintain a permanent record of it, with any contact in your phone.
